

Faith Luch
Manager

Experience

Faith has over 25 years of experience in operations management in various business fields, from the retail industry to construction to owning her own business. She has assisted various projects including OHSU, on numerous levels from assisting owners in procurement processes, representing owners with vendors for furniture and equipment, accounting and communication support.

Faith took on the challenge of organizing the accounting department and streamlined processes for better corporate and project accountability. Faith's energy and customer service strength provide our clients with an individual who can represent them on every level.

A recent achievement was the daunting task of coordinating 52 County Courthouse assessments throughout the state. Faith coordinated with the various county and state agency personnel, elected officials, architects and engineers to complete the assessments in an organized and timely fashion with little disruption to daily courthouse operations.

* Leadership * Management * Sustainability
