

Port of Portland P2 Completion

As a part of the HQP2 project, the seven story P2 long term parking structure is now open just in time for the spring break rush. P2 is located next to the original P1 short term parking structure. The new addition adds 3,500 spaces to the PDX parking capacity and allows for a more convenient approach to parking at the airport. The structure is connected directly to the airport with a tunnel featuring state of the art moving walkways with motion sensors that save on energy costs to further the Port of Portland's sustainability goals.

inici group's Haiti Response Fundraiser

inici group has joined forces with the Mercy Corps to help raise money for Haiti earthquake victims. inici group is committed to helping people, whether they are our neighbors or across borders. Please visit our [Mercy Corps fundraiser site](#) where you can read about the Mercy Corps relief efforts and the latest news out of Port-au-Prince. All contributions made through inici group's site are handled directly through the Mercy Corps. You can also check out [DJC Oregon's](#) site to read about what other local companies are doing to help.

Adventist Medical Center ED Lobby Completion

Adventist Medical Center has been transforming greatly with the Pavilion expansion. The new Emergency Department Lobby reflects the Adventist vision of putting the patient, family and friends first. The design on the room was focused on the ones who will be using it the most. Open spaces, comfortable furniture, free Wi-Fi, a fireplace, and large windows that let in natural light and televisions provide a calming and healing atmosphere. Our project team did a great job delivering this lobby.

inici's Current Projects Update

Karl Schulz and Marc Betts are hard at work wrapping up the Port of Portland HQP2 project as they prepare for the final move coordination. The Port staff from the downtown building and airport terminal will be under one roof at the end of May.

Karl Schulz, Tary Carlson, Faith Luch and Cheryl Dorman are working with OUS, OHSU and Portland State University on the Program Validation for the Life Sciences Collaborative Building.

Tary Carlson is assisting Tokyo Electron with a clean room build out that will increase their manufacturing capabilities. Thanks to Tary's skill set and oversight, TEL will be up and running on time.

OHSU Kohler Pavilion Wins AIA Award

The American Institute of Architects awarded the Providence North Portland Clinic and the OHSU Peter O. Kohler Pavilion for national health care designs. An article by the Oregon DJC states that these medical centers offer a better environment for all users of the building whether that is staff or patients. It was reported that these additional comforts lead to happier people and shorter hospital visits. More on this award can be found on the [DJC Oregon](#) website.

New Project

inici group is proud to help the Oregon University System, OHSU and PSU plan, coordinate and manage their upcoming Collaborative Complex on the South Waterfront's Schnitzer Campus. Once constructed, the space will be divided up between Oregon universities, colleges and private researchers.

Next quarter, look for an update regarding our work with the Los Angeles Community College District's Sustainable Building Program
